

Landscape Mulch

A Great Alternative to Standard Mulch!

Our Red Landscape Mulch is made from recycled clean wood pallets, generated by businesses and institutions across New England. Blended with natural mulches and uniformly colored, our mulch is a great alternative to

standard mulches. We offer a complete turn-key program; recycle your wood pallets with us and we will manufacture beautiful mulch which you may purchase back at a great price to landscape your facility.

We can deliver the mulch to you in "BULK", in 15 cy, 30 cy or 100 cy quantities. Ask about our volume discount for large orders. You'll be saving money and helping to close the recycling loop. Truly a win, win!

PolyCorn Packing Peanuts

*The Economical Choice for...
Loose-Fill
Packaging "Peanuts"*

The introduction of PolyCorn is truly a breakthrough in void fill packaging. PolyCorn is the first loose-fill product to be made completely from post-consumer and post-industrial foams. Every 15 cf bag created keeps over 32 cf of foams out of our already overtaxed landfills. Our feedstock comes from municipal recycling drop-off centers, computer assembly plants, machine manufacturers, packaging manufacturers, and even local residents. Truckloads, which previously went directly to landfills or incinerators, are now being diverted to the Conigliaro plant.

- 100% Recycled Loose-Fill Packaging, Over 90% Post-Consumer Content
- Complies with Proposed Packaging Mandates and Laws
- Dust Free and Treated with an Environmentally-Safe Anti-Static Solution
- PolyCorn is Less Expensive than Virgin or Corn Starch "Peanuts"
- Using PolyCorn Will Help You Improve the Environment & Your Bottom Line

PolyCorn, is a packing "peanut" manufactured from 100% recycled, 92% post-consumer foams. White PolyCorn is made from Polystyrene Foam Scrap and Pink PolyCorn is made from Polyethylene and Polypropylene Foam Scrap.

Plas-Crete Wall Blocks

**The Economical Choice for:
Retaining Walls
and Many Other Projects!**

Plas-Crete Blocks are perfect for contractors with skid-steers and mini-excavators. We've replaced the stone aggregate with recycled mixed plastic aggregate, so our blocks are half the weight. At 1850 pounds each, our blocks are strong, heavy enough to push against, yet light enough to handle and quickly assemble. They are true-to-size, nestable, self-centering and self-leveling. Each 2' x 2' x 4' block placed yields 8 sf of retaining wall coverage. Blocks can be placed at a rate of 25/hour! They're easy to use & look great!

Bobcat Friendly!

Tumbled Glass Aggregates

**Great for all types of decorative,
landscape & construction uses!**

Barefoot Friendly!

Our **Tumbled Glass Aggregates** are the perfect alternative to boring old landscape mulch. Better yet, you can "tip toe through the tulips" landscaped with our Tumbled Glass Aggregates in your bare feet! We make two sizes of Tumbled Glass Aggregate - **GlassSand** [1/8" minus] and **GlassGravel** [3/4" minus.] They are also perfect for all types of construction projects, including: road beds, retaining walls, drainage projects, pipeline flowable fill, etc... Imagine, colorful aggregates made completely from recycled glass bottles and plate glass. We have various sizes and color blends just for you. Our aggregates are tumbled to eliminate sharp edges and are free of metal and plastic rings.

Foam Insulation

The Economical Choice for Insulating:
Foundations
Basements
Storage Buildings & Barns & Equipment Garages
Barns and Chicken Coops
Hundreds of Other Uses!

**Our "once-used" foam insulation is perfect for many projects.
Although used, it is in excellent shape!**

We have 3 types of foam: Extruded Blueboard Foam
Isocyanurate Yellow Foam, and
Expanded Polystyrene White Beadboard

We have many sheet sizes: 2' x 4', 4' x 4', 4' x 8',
Thicknesses range from 1" to 6"

We will also arrange delivery right to your project site!

Boston's Best Patch
